Note 1: General

In May 2009, Assembly Bill 491 of the 2001-2002 California Legislature (codified in California Civil Code Section 1936 et seq.) authorized the San Diego County Regional Airport Authority (Airport Authority) to impose a \$10 Customer Facility Charge (CFC) per contract on rental cars at the San Diego International Airport.

On October 4, 2012, the Airport Authority Board of Directors approved an alternative CFC rate modification from the \$10 CFC rate per contract to \$6.00 per day (up to a maximum of five days) to allow for the collection of sufficient CFC funds to cover the future costs of the anticipated consolidated rental car facility and centralized bussing system. Effective January 1, 2014, the CFC fee increased from \$6.00 to \$7.50 per day up to a maximum of five days. As of June 30, 2016, a CFC forecast was examined to collect an alternative fee. This resulted in a CFC increase from \$7.50 to \$9.00 per day up to a maximum of five days, effective as of January 1, 2017.

In accordance with the program, the CFC revenue must be used to pay allowable costs for approved capital projects and operations. The Airport Authority is utilizing CFC revenue for the development and operation of a consolidated rental car facility. The primary objectives of this project are to reduce vehicle traffic volume on terminal curb front and Harbor Drive, provide a long-term rental car facility and site for airport passengers and rental car concessionaires, and implement a common use bussing system.

Note 2: Basis of Presentation

The accompanying *Schedule of Customer Facility Charge Collections and Expenditures* includes the CFC activity of the Airport Authority and is presented on the modified cash basis of accounting. Under the modified cash basis of accounting, CFC revenues are recognized when received rather than when earned (collections) and eligible expenditures are recognized when the related goods or services are provided or incurred. The information in this schedule is presented for purposes of additional analysis, as specified in California Civil Code Section 1936.

CFC expenditures may consist of direct project costs, administrative costs, debt service, and related financing costs. The accompanying Schedule of Customer Facility Charge Collections and Expenditures includes the eligible expenditures that have been applied against CFCs collected as of June 30, 2020.

Independent Auditor's Report

Members of the Board
San Diego County Regional Airport Authority
San Diego, CA

Report on Compliance for Customer Facility Charge Program

We have audited San Diego County Regional Airport Authority's (Airport Authority) compliance with the types of compliance requirements described in the *California Civil Code Section 1949* (Code) that could have a direct and material effect on the customer facility charge program for the year ended June 30, 2020.

Management's Responsibility

Management is responsible for compliance with the requirements of state statutes, regulations, and terms and conditions applicable to its customer facility charge program.

Auditor's Responsibility

Our responsibility is to express an opinion on the compliance of the Airport Authority based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the Code. Those standards and the Code require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on the customer facility charge program occurred. An audit includes examining, on a test basis, evidence about the Airport Authority's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance with the Code. However, our audit does not provide a legal determination on the Airport Authority's compliance.

Opinion on Customer Facility Charge Program

In our opinion, the San Diego County Regional Airport Authority complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on its customer facility charge program for the year ended June 30, 2020.

Report on Internal Control Over Compliance

Management of the Airport Authority is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered the Airport Authority's internal control over compliance with the requirements that could have a direct and material effect on the customer facility charge program in order to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing our opinion on compliance and to test and report on internal control over compliance in accordance with the Code, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the Airport Authority's internal control over compliance.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of the customer facility charge program on a timely basis. *A material weakness in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of the customer facility charge program will not be prevented, or detected and corrected, on a timely basis. *A significant deficiency in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of the customer facility charge program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the customer facility charge program. Accordingly, this report is not suitable for any other purpose.

Report on Schedule of Customer Facility Charge Collections and Expenditures

We have audited the financial statements of the Airport Authority as of and for the year ended June 30, 2020, and have issued our report thereon, dated October 20, 2020, which contained an unmodified opinion on those financial statements. Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The accompanying Schedule of Customer Facility Charge Collections and Expenditures is presented for purposes of additional analysis, as specified in the Code, and is not a required part of the financial statements. Such information is the responsibility of management and was derived from, and relates directly to, the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the *Schedule of Customer Facility Charge Collections and Expenditures* is fairly stated in all material respects in relation to the financial statements as a whole.
