# Market Commentary

Recent economic data suggests that the economy has lost momentum as virus cases have risen. We anticipated that economic data would soften during the winter months, and believe the near-term outlook remains challenging as the labor market remains under pressure and many regions have renewed business restrictions due to the virus. However, the passage of a new \$900 billion COVID-19 fiscal relief bill should help cushion the economy over the next few months, and we believe the incoming Presidential administration will have a keen focus on getting the economy back on track. We also remain very optimistic about progress on vaccines. A limited number of vaccine doses have already been distributed, and we expect more widespread distribution in the second and third quarter of 2021. We believe the distribution of vaccines and therapeutics will help fuel the economic recovery later this year. We also expect the Fed's highly accommodative monetary policy framework will continue to provide support for the financial markets.

The Federal Open Market Committee (FOMC) kept monetary policy unchanged at their December meeting as expected, with the fed funds target rate in a range of 0.0% to 0.25%. The Fed intends to remain highly accommodative until their goals of maximum employment and higher inflation are achieved. The Fed's summary of economic projections continues to signal that the target fed funds rate will remain unchanged until at least 2023, as policymakers do not expect inflation to exceed 2.0% during that timeframe. Until the Fed has made substantial progress toward achieving their dual mandate of maximum employment and price stability, they have set a floor for monthly asset purchases of at least \$80 billion per month of Treasuries and \$40 billion per month of agency mortgage-backed securities. Notably, the Fed's outlook for GDP over the next few years was revised higher and the outlook for unemployment was revised lower compared with their previous forecasts in September, which suggests increased optimism. Nevertheless, the outlook remains uncertain and Fed Chair Powell indicated that the Fed would increase policy accommodation further if progress toward their dual mandate slows.

# Third Quarter GDP

According to the third estimate, real US gross domestic product (GDP) grew at an annualized rate of 33.4% in the third quarter (up slightly from the advance and second estimates), following a 31.4% annualized decline in the second quarter. Third quarter GDP growth was by far the largest annualized gain on record but followed the largest annualized decline in GDP on record in the second quarter. Personal consumption expenditures rebounded in the third quarter and was by far the biggest contributor to third quarter GDP growth. The consensus estimates for fourth quarter 2020 and current quarter GDP growth are 4.2% and 2.3%, respectively. The consensus forecast for US gross domestic product growth in 2021 is 4.1%, following an expected 3.5% decline in 2020.

Third Quarter 2014 – Third Quarter 2020

# Initial Claims For Unemployment

In the most recent week, the number of initial jobless claims decreased to 900,000 compared to 926,000 in the prior week. The level of continuing unemployment claims (where the data is lagged by one week) also declined slightly to about 5.1 million from roughly 5.2 million in the prior week. Although continuing jobless claims are much lower than the peak of nearly 25 million last May, they remained well above the 2019 average of 1.7 million.

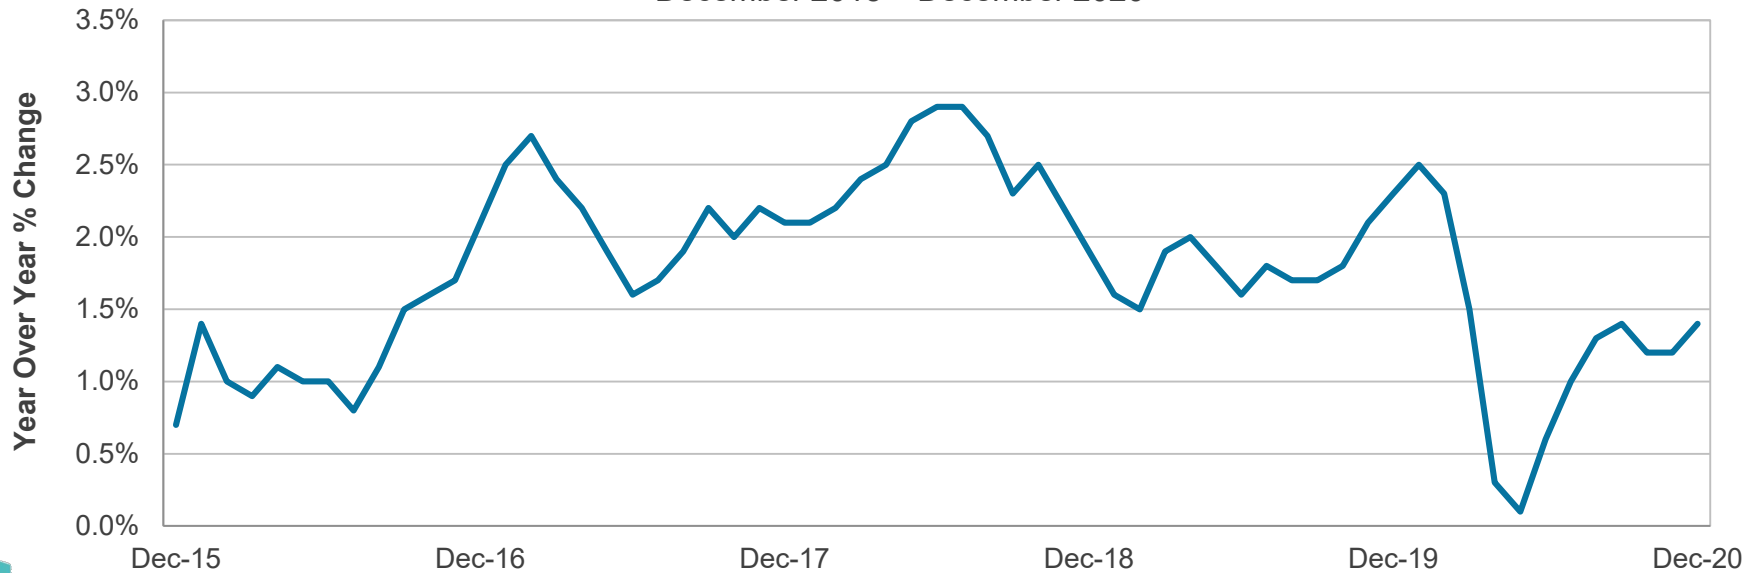

**Initial Jobless Claims and 4-Week Moving Average**  
October 16, 2020 – January 15, 2021

# Consumer Price Index

The Consumer Price Index (CPI) was up 1.4% year-over-year in December, versus up 1.2% year-over-year in November. Core CPI (CPI less food and energy) was up 1.6% year-over-year in December, unchanged from November. Inflation remains below the Fed's target.

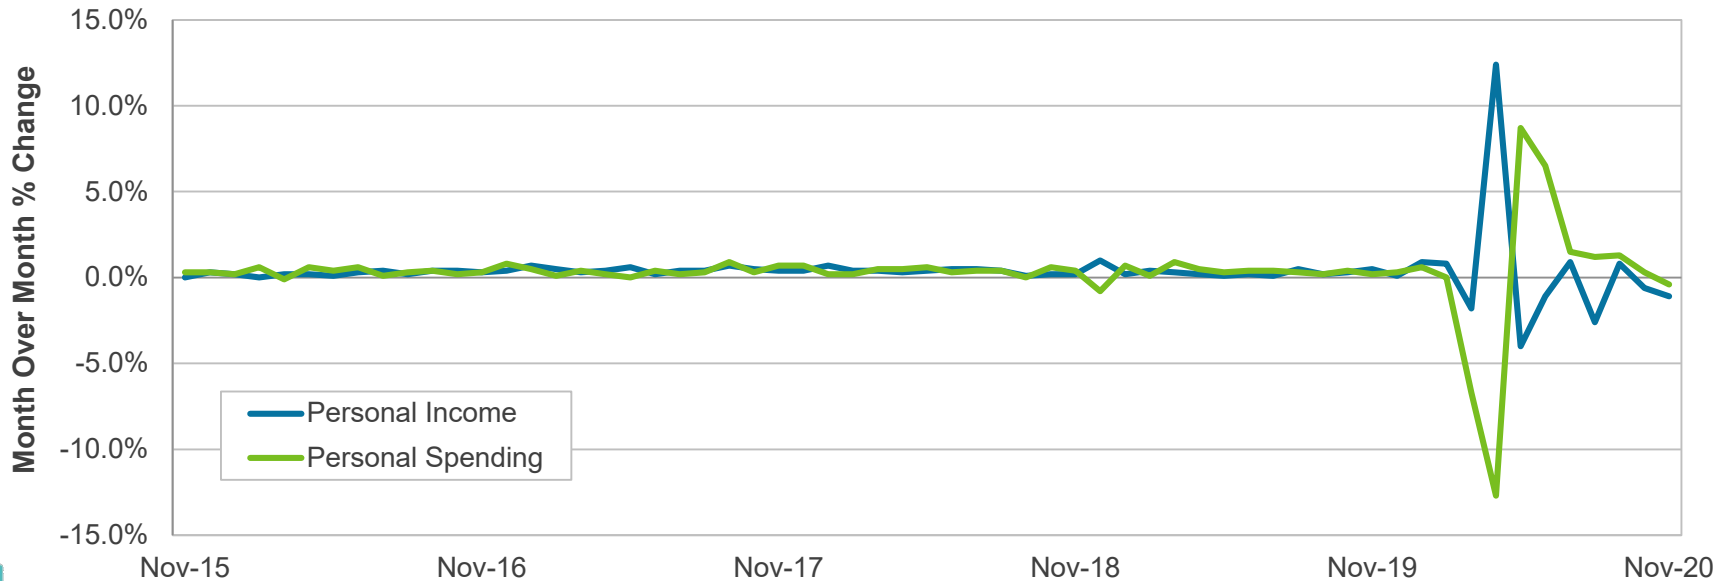

**Consumer Price Index (YoY%)**  
December 2015 – December 2020

# Personal Income and Spending

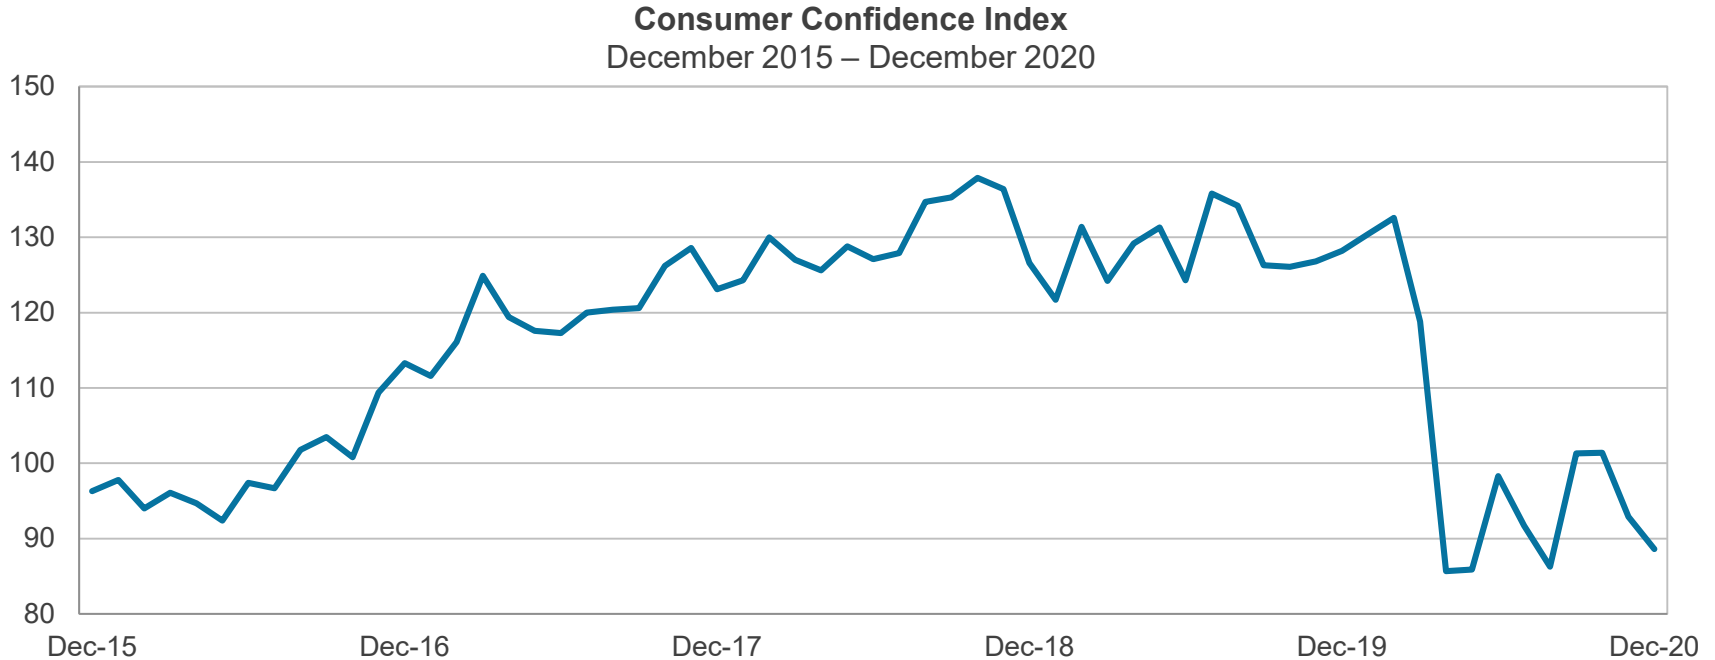

Personal income fell 1.1% in November, following a 0.6% decline in October. Meanwhile, consumer spending fell 0.4% in November following a 0.3% increase in October. Income and spending levels have been volatile during the pandemic due to the impact of shutdowns and uneven timing of government stimulus and pandemic-related unemployment benefits.

**Personal Income and Spending (MoM%)**  
November 2015 – November 2020

# Consumer Confidence Index

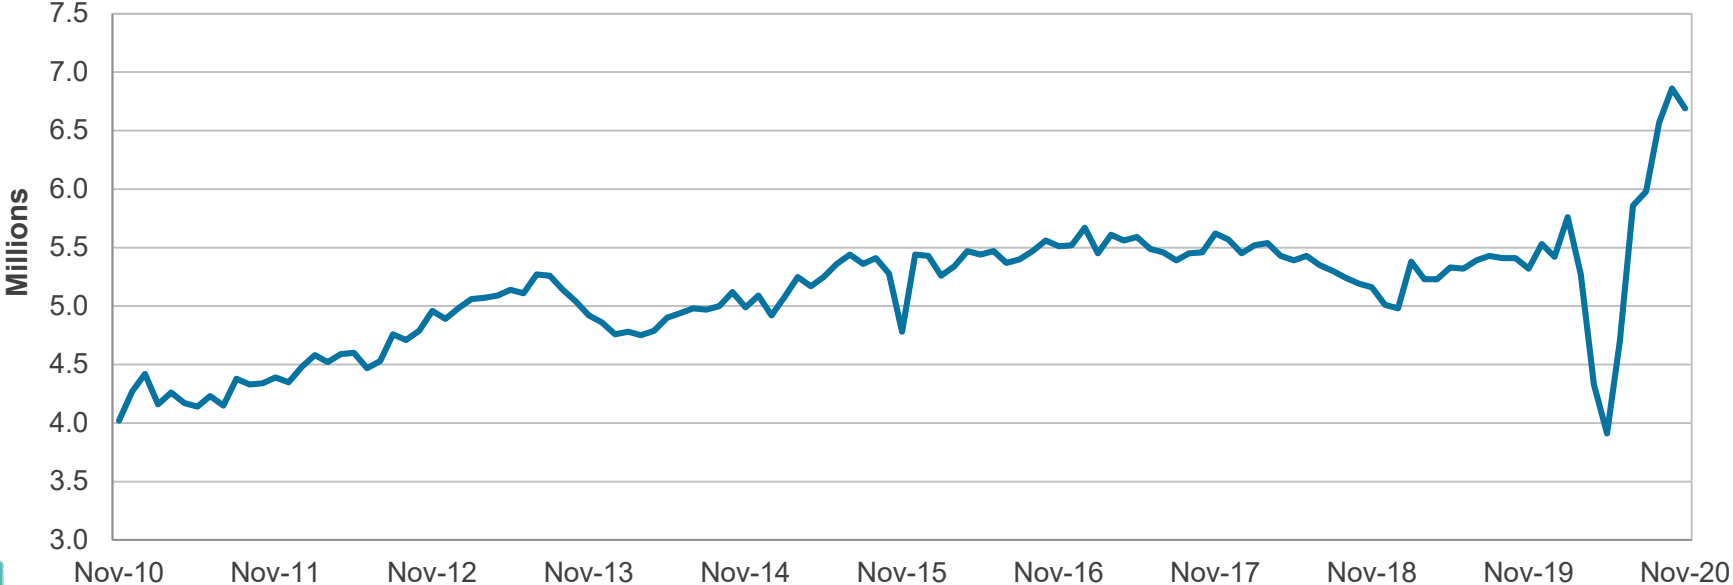

The Consumer Confidence index declined to 88.6 in December from 92.9 in November. The index is well below pre-pandemic levels at the start of this year.

# Existing Home Sales

Existing home sales declined 2.5% in November (following a 4.3% increase in October) to a very strong seasonally adjusted rate of 6.690 million units. On a year-over-year basis, sales of existing homes were up 25.8% in November. Very low mortgage rates, solid stock market performance, and a meaningful shift toward working from home are providing strong tailwinds for the housing sector.

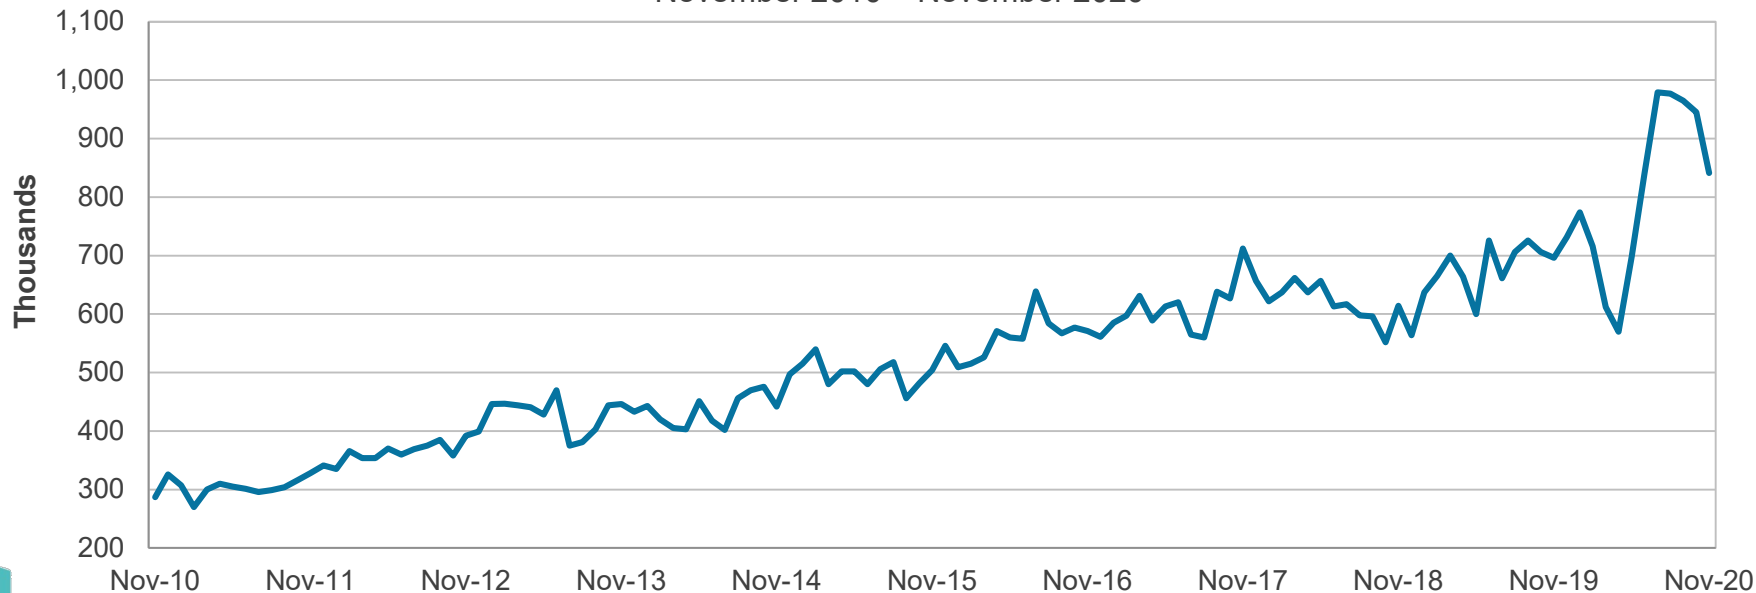

**U.S. Existing Home Sales (MoM)**  
November 2010 – November 2020

# New Home Sales

New home sales were softer than expected in November, down 11.0% to an annualized rate of 841,000 units. However, on a year-over-year basis, new home sales were up 20.8% in November. New home sales have been quite strong during the pandemic.

# Crude Oil Prices

U.S. West Texas Intermediate (WTI) crude settled at \$53.24 per barrel on January 20th, after crossing above \$50 per barrel earlier this month for the first time since February 2020. It is currently above its one month average of \$50.26 and its one year average of \$38.86. We believe the recent uptick in prices has been fueled by favorable vaccine news and expectations for a recovery in demand, as well as recent production cuts. Oil prices plummeted in the spring of 2020, driven by a severe disparity in the supply and demand for oil as well as the timing of futures contract expirations. Saudi Arabia, Russia and the US agreed in mid-April 2020 to lead a multinational coalition in oil production cuts. Under the agreement, world oil production was curtailed. On December 3rd, OPEC and its allies agreed to increase their collective output by 500,000 barrels a day (bpd), beginning in January 2021, signaling their confidence in a gradual recovery in global demand. However, Saudi Arabia (in a surprise move) said in early January 2021 it would unilaterally cut 1 million barrels a day of crude production starting next month.

January 20, 2016 – January 19, 2021

# Jet Fuel Prices

Jet fuel (U.S. Gulf Coast Spot) closed at \$1.438 per gallon on January 20th, above its one month average of \$1.389 and well above its one year average of \$1.079. A decline in global demand for jet fuel due to the coronavirus and ongoing travel restrictions put significant downward pressure on prices in 2020. However, favorable vaccine news and expectations for a gradual recovery in demand has supported a recovery in jet fuel prices.

# U.S. Equity Markets

In 2020, the DJIA was up 7.3% and the S&P 500 was up 16.3%. The tech-heavy Nasdaq index was up 43.6% in 2020. At year-end, the DJIA and S&P 500 were up 64.6% and 67.9%, respectively, from the March 23, 2020 pandemic low. We believe accommodative monetary policy, fiscal relief, and continued progress on vaccinations should be supportive of the economy and risk assets in 2021. Month-to-date, the DJIA and S&P 500 are up 1.9% and 2.6%, respectively.

# Treasury Yield History

The yield on 5-year Treasuries declined 133 basis points in 2020, and the yield on 2-year Treasuries declined about 145 basis points. Month-to-date in 2021, the yield on 5-year Treasuries has increased eight basis points, and the yield on 2-year Treasuries has inched up less than one basis point.

January 20, 2016 – January 21, 2021

# Treasury Yield History

Relative to this time last year, the yield curve has steepened. The spread between the 2-year Treasury yield and the 10-year Treasury yield has widened to about 95 basis points, from a spread of about 26 basis points at the same time last year. Yields across the curve are lower year-over-year, reflecting a decline in global economic growth, a decline in inflation expectations, and rate cuts by the Fed.

January 20, 2016 – January 20, 2021

# U.S. Treasury Yield Curve

Treasury yields are much lower on a year-over-year basis. Yields declined sharply in March 2020 with the Fed cutting rates by a total of 150 basis points and concerns about a global recession and a flight to safe-haven assets putting pressure on yields across the curve. The 3-month T-bill yield is down roughly 148 basis points, the 2-Year Treasury yield is also down about 143 basis points, and the 10-Year Treasury yield is down about 74 basis points, on a year-over-year basis. Notably, the Treasury began issuing a new 20-year bond in May 2020 (for the first time since 1986) to help fund the growing fiscal deficit and extend the average maturity of its debt.

2021 Chandler Asset Management, Inc, An Independent Registered Investment Adviser.

Information contained herein is confidential. Prices are provided by IDC, an independent pricing source. In the event IDC does not provide a price or if the price provided is not reflective of fair market value, Chandler will obtain pricing from an alternative approved third party pricing source in accordance with our written valuation policy and procedures. Our valuation procedures are also disclosed in Item 5 of our Form ADV Part 2A.

Performance results are presented gross-of-advisory fees and represent the client's Total Return. The deduction of advisory fees lowers performance results. These results include the reinvestment of dividends and other earnings. Past performance may not be indicative of future results. Therefore, clients should not assume that future performance of any specific investment or investment strategy will be profitable or equal to past performance levels. All investment strategies have the potential for profit or loss. Economic factors, market conditions or changes in investment strategies, contributions or withdrawals may materially alter the performance and results of your portfolio.

Index returns assume reinvestment of all distributions. Historical performance results for investment indexes generally do not reflect the deduction of transaction and/or custodial charges or the deduction of an investment management fee, the incurrence of which would have the effect of decreasing historical performance results. It is not possible to invest directly in an index.

Fixed income investments are subject to interest, credit and market risk. Interest rate risk: the value of fixed income investments will decline as interest rates rise. Credit risk: the possibility that the borrower may not be able to repay interest and principal. Low rated bonds generally have to pay higher interest rates to attract investors willing to take on greater risk. Market risk: the bond market in general could decline due to economic conditions, especially during periods of rising interest rates.

Ratings information have been provided by Moody's, S&P and Fitch through data feeds we believe to be reliable as of the date of this statement, however we cannot guarantee its accuracy.

Security level ratings for U.S. Agency issued mortgage-backed securities ("MBS") reflect the issuer rating because the securities themselves are not rated. The issuing U.S. Agency guarantees the full and timely payment of both principal and interest and carries a AA+/Aaa/AAA by S&P, Moody's and Fitch respectively.

## **STAFF REPORT**

Meeting Date: **JANUARY 25, 2021**

### **Subject:**

**Appointments to Board Committees, Liaison Positions, Other Representative and Alternate Positions**

### **Recommendation:**

Adopt Resolution No. 2021-0008, ratifying the emergency appointment of Johanna Schiavoni as the primary advisory member to the SANDAG Board of Directors.

### **Background/Justification:**

Authority Policy 1.20 establishes a policy for the formation of committees of and for the Board. Authority Policy 1.50 (5)(c), "Standing Board Committees", establishes four standing Board committees. Authority Policy 1.20 (1)(g) vests the Chair of the Board with emergency designation powers to fill any vacancy on any committee (except the Executive Committee) caused by the resignation, death, or removal for cause of a Board or other non-Board member serving on that committee. Emergency designations by the Chair shall be effective on the date made and shall remain valid until the next meeting of the Board when the vacancy can be considered and duly acted upon by the full Board. The resignation of April Boling, which was effective December 31, 2020, created the vacancy on the SANDAG Board of Directors.

On October 26, 2018, the SANDAG Board of Directors approved adding a representative of the San Diego County Regional Airport Authority Board to the SANDAG Board of Directors as an advisory member. SANDAG Board Policy: 002, requires the SANDAG member agencies to appoint members to the SANDAG Board of Directors and submit those appointments in writing to the Clerk of the Board by January 10. A vacancy has occurred due to the resignation of April Boling.

Pursuant to California Code Regulation Section 18702.5, *Materiality Standard: Economic Interest in Personal Finances*, the Authority is now required to post on its website, an F.P.P.C. Form 806 (See Exhibit A), listing all paid appointed positions on boards, committees, or commissions of a public agency, prior to the appointments being made.

It is recommended that the Board ratify the appointment of Johanna Schiavoni as the primary advisory member to the SANDAG Board of Directors to serve the remaining term of April Boling effective January 20, 2021 and ending December 31, 2021.

### **Fiscal Impact:**

Legislation limits compensation for Board Members to \$200 per day of service, with a maximum of eight (8) days per month. Adequate funds for Board Member compensation are included in the Authority Board Department adopted FY 2021 and conceptually approved FY 2022 Operating Expense Budgets.
