

NOTICE OF FINDING OF NO SIGNIFICANT IMPACT and RECORD OF DECISION

The Federal Aviation Administration (FAA) has announced that a Finding of No Significant Impact (FONSI) and Record of Decision (ROD) has been approved based upon results of a Final Environmental Assessment prepared in October 2021 for the proposed airfield improvements and Terminal 1 replacement project at the San Diego International Airport at San Diego, San Diego County, California.

The following project components subject to a Federal action are addressed by the FONSI and ROD:

- Demolish the existing 19-gate Terminal 1;
- Construct a new parallel Taxiway A;
- Construct a 30-gate replacement Terminal 1 facility;
- Relocate three FAA Airport Surface Detection Equipment – Model X (ASDE-X) sensors;
- Relocate five Remain Overnight (RON) aircraft parking positions east of the new Terminal 1;
- Eliminate two current RON positions;
- Construct new circulation roadways, including elevated departure curb, for new Terminal 1; and
- Construct new on-airport entry roadway.

The following project components **not** subject to a Federal action are also addressed by the FONSI and ROD:

- Demolition of the SDCRAA administration building;
- Construction of the replacement SDCRAA administration building;
- Construction of a new 5,500-space automobile parking structure adjacent to new Terminal 1;
- Expansion of the stormwater capture and reuse system; and
- Expansion of the existing CUP.

The FONSI/ROD indicates that the proposed action is consistent with existing environmental policies and objectives as set forth in the National Environmental Policy Act of 1969 in that it will not significantly affect the quality of the human environment.
